Truck Mounted Crane and Equipment Inspection

By Falcon Equipment in association with SKC Siu Engineering Ltd. and Stasuk Testing and Inspection Ltd.

Introducing Falcon Equipment's new in-house inspection, testing and certification program. We've partnered with some of the biggest names in welding repairs, inspection and testing to bring you the easiest, most convenient, and cost-effective way to take care of your truck mounted cranes and aerial devices. Stop worrying about compliance with regulatory requirements and rest assured that we have it covered. We'll provide you with electronic copies of certification documents, sealed by a professional engineer and delivered directly to your inbox within 24 hours of a passing inspection.

Easy:

Let us manage your inspection schedule. Using our state-of-the-art tracking system we will keep you up to date with notifications of regulatory inspections by either email or letter post. Even if you have cranes that weren't previously inspected by us, just inform us of the dates of the last inspections and we will take care of the rest. Combined with our new daily inspection logbooks there has never been an easier way to ensure complete compliance with the requirements of WorkSafeBC, the Occupational Health and Safety (OHS) Act, ASME B30.22-2005 Articulating boom cranes, and CSA Z150-98 Safety code on mobile cranes.

Convenient:

Just drop your truck off and leave the rest to us. Whether it's a Knuckle Boom, Stiff Boom, or Aerial Device we have the resources, equipment and know-how to take care of it. Following inspection, our team will deliver a thorough report itemizing every component inspected. If repairs are required prior to certification we'll take care of it with the attention and commitment to detail you've come to expect from BC's leading retailer of truck-mounted lifting devices.

Cost Effective:

With preventive maintenance, inspection, repairs and certification service offered at both our Surrey and Prince George locations we truly are a one-stop shop. This means we can minimize your downtime while offering unbeatable service, all at a price point that will keep your accountant smiling. Plus take advantage of value-added service such as flexible inspection times, mobile service trucks and same-day replacement of lost or damaged reports and certification documents.

Experienced:

When launching our new program we wanted to make sure that we had some of the most experienced names in the inspection and testing industry along for the ride. With over 60 years experience between them, Steve Siu, P.Eng. of SKC Siu Engineering (www.skcsiue.com), and Dave Stasuk, P.Eng. of Stasuk Testing & Inspection (www.nde.net), are the perfect fit. Together they have overseen the development of our new inspection program and put our staff through a rigorous training schedule to ensure that we have the required experience to offer the high quality of service that you've come to expect from Falcon equipment.
